GRID-CONNECTED SOLAR PV FOR COMMERCIAL ROOFTOPS

Solar PV systems are the “new-energy” resource for generating electricity for commercial and industrial purposes. Our systems provide a continuous supply of power for industrial machines that allows our customers to utilise renewable energy while at the same time reducing power costs.

IMMEDIATE ENERGY SAVINGS

Create cost savings on your electricity consumption.

NO UPFRONT CAPITAL

Approved customers pay a monthly fee only once the system is operational.

HASSLE-FREE OPERATIONS

We operate the system to ensure peak performance.

SUPPLY CHAIN SUSTAINABILITY

Enhanced your environmental and sustainability credentials.

GO GREEN GO CLEAN

Power up to 30% of your day time electricity needs with clean energy.

ENHANCED PROPERTY VALUE

Increase the value of your property and attract higher quality tenants.

**START REDUCING
YOUR POWER
BILLS NOW WITH
NO UP-FRONT COSTS.**

We tailor and select the most efficient system for your electricity needs and provide product and performance warranties so that you receive more electricity over the life of your system.

At first glance, solar PV may seem to be a simple technology, however, to achieve optimum performance, it is critical for an experienced developer, installer and O&M partner to be used.

Our selection of technology and monitoring solutions allows for real-time data access as well as the option to receive regular real-time, emailed or direct-from-app, performance reports to monitor the performance of your system.

WE OFFER TURNKEY COMMERCIAL AND INDUSTRIAL ROOFTOP SOLAR PV SOLUTIONS TO BUSINESSES ACROSS SOUTH-EAST ASIA.

FLEXIBLE LEASING PERIOD

- Outright purchase option
- Multi-year lease options
- Standard and premium inverter options
- Customised terms available for contracts above 10 MW

PAYMENT GUARANTEE OPTIONS

- Surety Bond
- Bank Guarantee
- Parent Guarantee

ATTRACTIVE LEASING TERMS

- Minimum project size of 500 KW
- Fixed monthly payment terms
- Annual escalation below inflation
- Guaranteed to reduce your overall electricity bill
- Option to extend your lease upon expiry at a lower tariff for up to an additional ten years

Our systems allow you to reduce the cost of your overall electricity consumption. We provide panels with a higher power factor so that you can receive maximum generation to create the most savings possible.

Our installer partners have been trained to international standards and have successfully executed projects for more than a decade across the region. This means, your energy needs are in safe hands with Quantum.

OUR SYSTEMS FEATURE

- Tier-I high efficiency solar panels
- Inverters with built in remote monitoring
- User accessible system performance dashboard
- Premium inverter technology option
- All components meet international standards
- 25-year solar PV panel performance warranty
- 10-year standard inverter warranty
- Customised designs are also available for rooftop mounting such as parking canopies.
